REVISION LOG

| Rev. | Remarks | |
|------|---|--|
| 80 | Section 14 – Reduced torque values for brass and other soft metal fittings added. Table 19 – HGT-FT BSPP Plugs updated to include hollow hex plugs | |
| 79 | Added Table 31 – Torque for Diffuser Hose Clamp | |
| 78 | Added Section 17.15 – Vibration Mounts | |
| 77 | Added Section 17.14 – Torque values for IGUS CFX Clamps | |
| 76 | Table 30 – Heavy-Duty Hose Clamp (T-Bolt Style). Model number and torque values updated | |
| 75 | Added Section 17.13 – Torque value for EV9 Flow Control Valve (HPN 7610661) | |
| 74 | Added Section 17.8.1 – Torque value for Hydac Differential Pressure Transmitter (HPN 6404099). Torque values for orifices on hydraulic manifolds added (See Table 27). Torque values for gas valves added (See Section 17.12) | |
| 73 | Updated torque for heater bands which have corrugated sheet metal on the outside diameter and also having an M6 clamping screw (Section 15, Table 22). Also updated torque values in section 17.7 for the Hydac oil level sight gauge to align with supplier specification. | |
| 72 | Updated torque requirements for EOAT Tube Retainer Pins in section 19.2. Section 17.8 Torque values for Hydac PTs reviewed with Hydac (Feb. 16, 2022) and increased from 20 N-m to 40 N-m. The purpose of the increased torque is to reduce/eliminate oil leakage from PT and fitting interface. Both Hydac and Husky test results show insignificant effect of increased torque on PT performance (i.e. insignificant null point shift). | |
| 71 | Added section 19.13: Torque Specification for NexPET Core Sleeve Set Screws. DLO specifications updated (2205) | |

| 70 | Updated CoolPik Vacuum/Blow Pin Torque Specifications Table 40 with values for M20 blow pins |
|----|---|
| 69 | Removed Adhesive info and moved to HS 897 – Adhesive Standard. Left Torque/Loctite info for clamp fasteners. |
| 68 | Section 17.08 Torque values added for new Hydac PT HPN 9247632 |
| 67 | Lubrication notes added to section 14 - Torque values for fittings (HGT-FT) |
| 66 | Section 14 Torque values for fittings (HGT-FT) reviewed and updated: Section 14.1 relocated and revised to clarify assembly lubrication practices. Tables 12, 13, 14, 15, 18 and 19 updated as per the latest industry standards from Parker and Manuli. Section 17.11 added: Torque value for male pressure test point specified as per latest Hydac catalog. |
| 65 | ORFS hose end fittings specifications: Increased torque values in table 13. Note: Previous torque values were too low especially for the smaller sizes and failed a pull test audit. Manuli torque values for nut tightening have been tested and approved. Warning: Husky torque specifications apply to lubricated parts while Manuli's apply in dry conditions. As a result, Husky exceeds Manuli's recommended preload. |
| | DLO Details 2015 specifications: Sheet 1: Added Spade terminal "S0" and "S8" Code. Sheet 6: HPN 7404990 updated AWG and Torque value. HPN 5832899 updated AWG value. Sheet 8: Added * Larger termination screws Sheet 10: HPN 2172625 added load side termination details Sheet 11: Added HPN 2351717 Sheet 12: Added HPN 6344019 Sheet 14: Added HPN 8425223 |
| 64 | DLO Details 1933 table updated to reflect current product usage along with torque value consolidation - See section 15 or DLO Details (English) 1937 or DLO Details (Chinese) 1937 specifications |
| 63 | DLO device torque specifications changes (DLO Details 1933) - See section 15 or <u>HGT-EL DLO</u> |
| 62 | Unit changed from ft-lb to in-lb in Table 22 - HGT-EL Metric and Imperial Screws, Mounting Hardware (Electrical Applications) to align with other tables and tooling in use |
| 61 | HF and Cxx stopper code notes updated in <u>HGT-EL DLO</u> |
| 60 | Section 17.6 Added value for 2.5" G2 Section 17.5 Updated table for DBDS relief valves |
| 59 | Added Section 17.10 for Numatics air valve assemblies |
| 58 | Section 17.8 updated. Old Hydac pressure transducer (HPN 3875996) replaced with new (HPN 7980938) |
| 57 | Added torques for Stopflex hose bands and heavy-duty hose clamp (T-Bolt style) |
| 56 | Added torque for electrical cabinet door ground stud |
| 55 | Updated as per SR 51455: Added note/picture for Cold Half and Hot Runner Mounting to Machine Platen in Husky General Torque (HGT) - Standard Applications |
| 54 | Updated as per SR 50799: Added sections 19.9, 19.10, 19.11, 19.12. Updated Sections 19.5, 19.6, 19.7, 19.9. Replaced and moved the table from section 19.7 to section 19.8 |
| 53 | Added torque specifications for Premolded Cables, Electrical Applications). Bookmarks to multiple tables added. Table for HGT-35 specifications updated (Stainless steel A2, socket head cap screw application added) |
| 52 | Table for HGT-EL Heater Bands, Electrical Applications updated. Torque values for UNC # 1/4 - 20 spider straps and post terminal nut added. Torque values for Danfoss pressure transducers added (see section 17.9) |
| 51 | Added torque specifications for Neck Ring Plugs |
| 50 | Section 15 – HGT-EL Heater Bands, Electrical Applications updated. Torque value applied to ground stud nut specified. |
| 49 | Section 4 – References updated for HGT 80, 50 and 35 torque calculations (units of measure added) |
| 48 | Torque value for solid state relay added |
| | <u> </u> |

| 47 | 2739013 CAM follower torque specifications updated |
|----------|--|
| 46 | Table 1 updated and new Figure 1 added to clarify Husky General Torque Standard Applications (#1 to 8) |
| 45 | Torque values for Watlow heater bands added |
| 44 | Updated torque values for Watlow heater bands, torque values for Hydac oil level indicators added (see section 17.7), torque values for Hydac pressure transducers added (see section 17.8). HGT-EL DLO updated as per latest master |
| 43 | Updated torque values for HGT-LHCS (Low Head Cap Screws) |
| 42 | Section 19.1 |
| 41 | Baumuller torque values in HGT-EL DLO updated to reflect mid-range torque values |
| 40 | Minor addition to sheet 6 in HGT-EL DLO as per manufacturing request |
| 39 | HGT-LHCS (Low Head Cap Screws) specifications added (section 13). Warning section added (section 5) |
| 38 | Section 13 updated (HGL-EL). Torque values for DLO related connections removed and consolidated into a separate document: HGT-EL DLO |
| 37 | Updated torque values for COOLPIK blow/vacuum pins in section 19.3 . Reference SIR 105554 |
| 36 | Torque values for heater bands added/updated |
| 35 | Added note that states: "this document has a duplicate copy that's published to www.husky.co , all future revisions must be posted to www. husky.ca" |
| 34 | Reference to Ampco 18 mounting screws removed |
| 33 | Added screw interchangeability notes in tables 4, 5, 6, and 8. Added screw interchangeability warning in section 5 |
| 32 | Added new Section 17 for PET Mold and Hot Runner Special Torque Applications |
| 31 | Tables under section 15.8 reformatted (bladder accumulator neck adaptor specifications) |
| 30 | Torque values for accumulator neck adaptors added |
| 29 | Application notes (section 5.1) reviewed and updated: Torque values for high temperature applications (>150°C) statement clarified |
| 28 | HGT-EL torque values for Breakers, fuses and lugs updated |
| 27 | Baumueller BM44XX Servo Drive Torque values added |
| 26 | Torque values for SAE plugs reviewed and updated |
| 25 | CAM follower torque values have been in Section 15.7 |
| 24 | Torque values added to HGT-EL Lugged Connections - Electrical Applications |
| 23 | Torque values for SAE plugs updated |
| 22 | Torque values for Siemens 5SY series breaker added |
| 21 | Torque values for Woehner and Ferraz Shawmut fuse holder added |
| 20 | Torques for Bosch Rexroth DBDS pressure relief valves added (see section 17.5) |
| 19 | Lubricants section removed (transferred to HS 609) |
| 18 | Section 7.1, gearbox oil added |
| 17 | Hoist ring torquing requirements updated (SR 13841) |
| 16 | Remove note in revision 15 |
| 15 14 | Add note for 4mm socket option for M10 (see section 10, B note) Updated 'Table 1 – Husky General Torque Standards Applications': HR and Mold Liftbars with M30 installations to use HGT-35 – |
| 13 | SR13141 Updated 'Table 1 – Husky General Torque Standards Applications': HR Liftbars to use HGT-50 as well – SR13141 |
| 12 | Torques for electrical components added. |
| | References to "Husky Classes" added (e.g. Unbrako, Holokrome, YFS, etc. socket head cap screws). |
| 11 | Added applications notes for adhesives usage and selection (section 7.2.1 and 7.2.2 added) |
| 10 | Table 1 and application notes (section 5.1) updated to clarify the default preload (HGT-80, 50 or 35). Drawing specifications section updated (see section 14). Torque table shown on assembly drawings replaced by a note referring to the HS 252. |
| | |

| 9 | Approved hydraulic oils specified in HS 207. Reference to HS207 added to "Lubricants for General Application" section (Table 2). Note: table 2 transferred to HS 609 (see revision 19) | | | |
|---|--|--|--|--|
| 8 | Added Manuli hose fittings, torque tolerances changed to +/-4% (section 6 updated) | | | |
| 7 | Torque values applied to threaded rod applications and maximum allowable preload on 10.9 fasteners | | | |
| 6 | New torque chart for AMPCO 18 applications added (see section 15.5), FFWR torque values for ORFS fittings added | | | |
| 5 | Section 4 references added, section 6 torque tolerances added, tolerance values reviewed by tool supplier, document title changed. | | | |
| 4 | New standard template used, torque values for SAE plugs updated, bulkhead locknut torque values added, torque for BSPT fittings and plugs added, lubricant section modified, torque tolerances added, etc. | | | |
| 3 | Torque values for grade 10.9 and 12.9 screws consolidated, torque values for hydraulic applications and split flanges added, drawing specifications section updated, etc. | | | |
| 2 | New format, new part numbers for FGL-2 grease, updated notes and units of measure | | | |

| HUSKI | Revision Level - 80 - PUBLISHED | Security Level - PUBLIC | Standard No. | HS 252 |

1 SCOPE

HGT (Husky General Torque) is a general torque standard that applies to threaded connections that do not have their respective torque values indicated on the drawing. Any other torque values such as the supplier's recommended torque specifications specified in Section 17 or any other deviations from the general standard must be individually specified on the drawing. Any deviations from this standard must be justified by calculations.

2 PURPOSE

To provide a list of general torque values and lubrication practices to be used on Husky product.

3 DOCUMENT CONTROL

Revisions to this document shall be authorized by Corporate Operations.

4 REFERENCES

The torque values specified in this document come from the following Industry Standards, Suppliers Catalogs and/or formulae:

| HGT-80 Metric Fasteners | T = K.F.d | Standard proofload ratios: |
|---|--|--|
| HGT-80 Imperial Fasteners | - Torque T in Newton-meter | 80, 50 and 35%. |
| HGT-50 Metric Fasteners | - Coefficient of friction $\mu = 0.12$ - Torque coefficient K (0.15 \leq K \leq 0.17) | E.g. 80% preload means that the torque will produce enough |
| HGT-50 Imperial Fasteners | - Induced screw load F in Newton | energy to achieve 80% of what |
| HGT-35 Metric Fasteners | - Nominal diameter d in meter | the bolt is capable of without |
| HGT-35 Imperial Fasteners | - ISO 898-1 (grades 12.9 & 10.9) and ASTM A574 | permanent deformation. |
| HGT-SS Metric Set Screws | ISO 898/5-1980 Table 5 and ASTM F912-1986 Table | e 2 |
| HGT-SS Imperial Screws | ASTM F912-1986 | |
| HGT-LHCS Metric Screws | Torque values provided by manufacturer | |
| HGT-FT ORFS Tube Ends | Parker Catalog 4300 (April 2017) | |
| HGT-FT SAE and BSPP Ends | Parker Catalog 4300 (April 2017) | |

5 WARNINGS

Always use the correct parts and the proper torques. Incorrect fastener connections can dangerously weaken assemblies. Ensure that all safety information, instructions and warnings such as shown in the two examples below are read and understood before any operation or any maintenance procedures are performed.

CAUTION!

Mechanical hazard – risk of equipment damage. Use of improper torque can result in equipment damage. Consult the assembly drawings for the torque specifications before referring to the torque charts in this section.

WARNING!

Molten plastic spray hazard - risk of serious injury and equipment damage. If incorrectly sized screws are used, equipment damage may occur that could result in uncontained molten plastic spray. If replacing the screws, only use the screw sizes specified in the machine bill of material.

6 APPLICATIONS

HGT consists of seven torque standards HGT-80, HGT-50, HGT-35, HGT-SS, HGT-LHCS, HGT-FT and HGT-EL as shown in Table 1. For mechanical applications, screws are torqued to the HGT-80, HGT-50, HGT-35 or HGT-LHCS standards. For electrical applications, screws and other components are torqued to the HGT-EL standard. Set screws are torqued to the HGT-SS standard and fittings to the HGT-FT standard. Deviations from Husky General Torque Standards for Special PET Mold and Hot Runner applications are listed below and are cited in detail in section 19.

- 19.1 CAM Follower Torque Specifications
- 19.2 EOAT Tube Retainer Pin Torque Specification
- 19.3 CoolPik Vacuum/Blow Pin Torque Specifications
- 19.4 CoolPik Moving Puck Installation Torque Specification
- 19.5 CoolPik Plate Mounting Torque Specification
- 19.6 Mold/Hot Runner Lift Bars Mounting Screws Torque Applications
- 19.7 Gib/Wear Plate Mounting Screws Torque Specification
- 19.8 Neck ring plugs Torque Specification
- 19.9 Stack Inserts Torque Specification
- 19.10 Torque Specification for Water Manifolds to Slides
- 19.11 Torque Specification for Slide to Connecting Bars
- 19.12 Torque Specification for EOAT Assy. to Robot
- 19.13 Torque Specification for NexPET Core Sleeve Set Screws

6.1 APPLICATION NOTES

- Washers are recommended for oversized holes and slots.
- Heavy washers (DIN 7349) are recommended for cast aluminum applications.
- The HGT-80 standard is recommended for the majority of Hot Runner products: These high strength and/or high fatigue applications use grade 12.9 bolts that will not crush, gall, warp or fracture the joint material under preload (e.g. high-strength alloy steel).
- The HGT-50 standard is recommended for the majority of Machine and Mold product applications. HGT-50 ensures that the area below the screw head does not bear into the seating material and the threads do no shear upon torquing.
- The HGT-35 standard is recommended for those applications where the yield strength of the base material would otherwise be exceeded under a 50% preload. An example is clamping a cantilevered section such as a belt clamp that is subject to bending stress.
- Torque values for high temperature applications (>150°C) should be calculated and individually specified on the drawing as required. If no values are indicated on the drawing, the general HGT standard should be used (e.g. HGT-50 for Machine and Mold applications, HGT-80 for Hot Runner applications).
- In all applications the joint must be designed to carry the load safely and without separation.
- Screw sizes and torque values must be supported by calculations for externally applied loads that are subjected to fatigue action such as pressurized vessels.
- When maintenance or service requires the replacement of screws, it is recommended that they
 be the same ones specified in the machine Bill of Material. Due to the interchangeability
 between some metric and imperial screws, incorrect sizes may provide insufficient bolt preload
 over time.

7 TORQUE TOLERANCES

The more accurate the method of controlling tightness the more of the strength of the fastener can be utilized. The tolerance values specified in this standard pertain to the tool's accuracy and not the induced fastener's load that is affected by other variables such as lubrication, clamped materials, temperature, etc. For example, assembly torque wrenches should be calibrated to stay within +/-4% when applying HGT-50, 80 or 35 and the fastener's induced load accuracy can be expected to range from +/- 10-20%.

14 HGT-FT STANDARD (FITTINGS)

The following tables provide the recommended torque values required for the safe and effective operation of the fittings using a torque wrench or other methods such as "Turn From Finger Tight", "Flats From Finger Tight" or "Flats from Wrench Resistance". For TFFT or FFFT, the joint should be hand tightened snugly and then tightened with a wrench by the number of flats or turns indicated by the table. For "FFWR", the joint should be tightened snugly with a wrench and then tightened again with the same wrench by the number of flats indicated by the table. The torque method of assembly is the preferred method of assembly. It reduces the risk of human error during assembly that is more prevalent in the "FFWR" method. To ensure the most accurate assembly of the fitting, it is strongly recommended that the torque method be utilized.

14.1 IMPORTANT NOTES

- O-rings must always be lubricated.
- Refer to the notes in red and the following symbols to determine if lubricant should be applied to threads.

Apply lubricant to threads

Do not apply lubricant to threads

- Values are for steel fittings in steel ports.
- For stainless steel fittings, please use the upper limit of torque range. Exclusion: NPT and BSPT fittings.
- For fittings made of softer metals such as brass or aluminum, decrease the torque values by 35% or use the reduced values shown under the following symbol. Exclusion: NPT and BSPT fittings.

Reduced values for brass or other soft metal fittings

- For NPT and BSPT elbows, never back off to achieve alignment.
- For ferrule (bite) fittings, manually screw the nut on the fitting body until finger tight. Continue to tighten the joint with a wrench by the number of flats indicated in the table. If the fitting body was used for ferrule pre-set, the nut must be re-tightened to the same fitting body used earlier in pre-set.
- Assembled parts (nut and adapter) must have identical plating.
- Torque values shown apply to the ends indicated by arrows.

For brass or other soft metal NPT and BSPT fittings, TFFT does not change

Table 16 - HGT-FT Flareless Tube Ends

* IMPORTANT: Carbon steel components: Lubricate threads before assembly. No additional lubrication is required for stainless steel fittings as the nuts are prelubricated. Note: For final assembly of swivel nut fittings (R6BU, C6BU and S6BU), a 3/4 TFFT is required for all sizes.

For brass or other soft metal bite fittings, TFFT does not change

Table 17 – HGT-FT SAE Plugs

| Steel Fitt | Steel Fittings - SAE Straight Thread Plugs | | | | | |

16 DRAWING SPECIFICATIONS

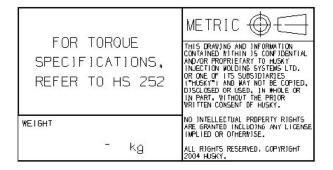

- All fasteners and fittings requiring a torque value that deviates from the HGT standards or special torque specifications displayed in section 17 must be individually specified on the drawing next to the item reference (balloon or arrow on the assembly drawing as shown in Figure 3).
- A note referring to the torque standard (HS 252) will be inscribed in the title block of the assembly drawing (see in Figure 4).

17.15 VIBRATION MOUNTS

Apply HGT-35 torque to all vibration mounts unless otherwise specified on assembly drawings or work instructions.

18 International Standards Torque Specifications

The following torque values obtained from international standards are specified on the drawing when deviating from the Husky general torque standard.

18.1 ISO 6162:1994 - SPLIT FLANGE ASSEMBLIES

Table 37 – Code 61 Split Flange Assemblies

| 4 Bolt Split Flange Assemblies Code 61 (25 bar to 350 bar series) | | | |
|--|--|-------|--|
| Bolt Size | Torque (+25% - 0) See Section 18.3 | | |
| | N-m | ft-1b | |
| M8 | 25 | 18 | |
| M10 | 53 | 40 | |
| M12 | 95 | 70 | |
| M16 | 220 | 160 | |
| Lubricant | Lubriplate FGL-1 or Molykote G – rapid plus with MoS2 | | |

Table 38 – Code 62 Split Flange Assemblies

| 4 Bolt Split Flange Assemblies Code 62 (400 bar series) | | | |
|--|--|-------|--|
| Bolt Size | Torque (+25% - 0) See Section 18.3 | | |
| | N-m | ft-lb | |
| M8 | 25 | 18 | |
| M10 | 53 | 40 | |
| M12 | 95 | 70 | |
| M14 | 150 | 110 | |
| M16 | 220 | 160 | |
| M20 | 390 | 290 | |
| Lubricant | Lubriplate FGL-1 or Molykote G – rapid plus with MoS2 | | |

18.2 CAUTION

It is important that all screws be lightly torqued (e.g. from 1 to 2 FFFT) before applying the final recommended torque values to avoid breaking the flange halves during installation.

18.3 **NOTES**

- The recommended torque values are consistent with the HGT-50 general standard. Exception: M14 bolts (special size requiring a note on the drawing).
- The recommended torque values may be increased by 25% when flange head screws of property 12.9 screws are used with Unbrako Durlok-12.9 screws.

19 PET MOLD AND HOT RUNNER SPECIAL TORQUE SPECIFICATIONS

Following torque specifications must be applied accordingly to ensure proper installation.

19.1 CAM FOLLOWER TORQUE SPECIFICATIONS

Table 39 – CAM Follower Torque Specifications

| CAM follower HPN | Component | Torque [N-m] | Torque [ft-lb] |
|-------------------------|--------------|--------------|----------------|
| 1425388 | Nut | 22 N-m | 16 ft-lb |
| 1502548 | Nut | 87 N-m | 64 ft-lb |
| 2739013 | Cam Follower | 87 N-m | 64 ft-lb |
| | Set Screw | 8.5-9 N-m | 6.3-6.6 ft-lb |
| 5792862 | Cam Follower | 87 N-m | 64 ft-lb |
| 5792002 | Set Screw | 8.5-9 N-m | 6.3-6.6 ft-lb |

19.4 COOLPIK MOVING PUCK INSTALLATION TORQUE SPECIFICATION

Apply following torque during moving puck installation.

Figure 8 – Moving Puck Assembly Installation Torque Specification

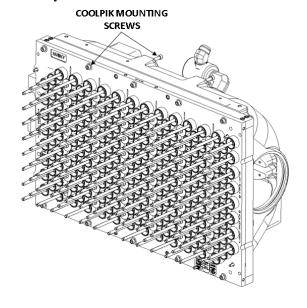

Torque the sub-assembly into the COOLPIK plate to 18 N-m through the top of the pin using an 8mm socket.

19.5 COOLPIK PLATE MOUNTING TORQUE SPECIFICATION

Apply HGT-80 [77N-m (56.8 lb-ft)] torque for M10 COOLPIK plate mounting screws.

Figure 9 – COOLPIK Assembly on Machine Plenum

19.6 MOLD/HOT RUNNER LIFT BARS MOUNTING SCREWS TORQUE APPLICATIONS

Table 42 - Mold/Hot Runner Lift Bars Mounting Screws Torque Specifications

| Арр | Application | | Hardware | Base/Threaded Material | Torque Standard |
|------------|--|--------------------------------|--|---|--------------------|
| | • Hot Runner/Mold Lift Bars Mounting Screws (Excluding M30 and Larger | Screws and Threaded Rods | - DIN 912-12.9 SHCS - DURLOK-12.9-UNB HHS - DIN 933 & 931-10.9 HHCS - DIN 976-12.9&10.9 ROD - ASTM A574 SHCS | Steel Cast Iron | HGT-50 |
| Mechanical | • Hot Runner/Mold Lift Bars Mounting Screws, M30 and Larger Sizes | Screws and Threaded Rods | - DIN 912-12.9 SHCS - DURLOK-12.9-UNB HHS - DIN 933 & 931-10.9 HHCS - DIN 976-12.9&10.9 ROD - DIN 7991-10.9 FHCS - ISO 7380-10.9 BHCS - ASTM A574 SHCS | Any Material for Lift Bar Mounting Screws | HGT-35 |

19.7 GIB/WEAR PLATE MOUNTING SCREWS TORQUE SPECIFICATION

Apply HGT-50 on Gibs and Wear Plates.

Apply HGT-LHCS for Wear Plates using LHCS.

19.8 NECK RING PLUGS TORQUE SPECIFICATION

Apply appropriate torque to the Neck Ring plugs according to the table below.

Table 43 – Neck Ring Plugs Torque Specifications

| HPN | Size | Material | | ntening Torque / - 10%) |
|---------|------|----------|-----|----------------------------|
| | | | N-m | ft-lb |
| 4125714 | M5 | Brass | 1.5 | 1.1 |
| 6359476 | 1/16 | Brass | 7 | 5.2 |

19.9 STACK INSERTS TORQUE SPECIFICATION

Apply HGT-80 on all SHCS's that are used on Stack Inserts.

| HIICKY | HS 252 - STANDARD ASSEMBLY TORQUES | | Page | 38 of 51 |

| HU3N1 | Revision Level - 80 - PUBLISHED | Security Level - PUBLIC | Standard No. | HS 252 |

19.10 TORQUE SPECIFICATION FOR WATER MANIFOLDS TO SLIDES

Apply HGT-80 on all SHCS's that are used to mount Slide Water Manifolds to Slides.

19.11 TORQUE SPECIFICATION FOR SLIDE TO CONNECTING BARS

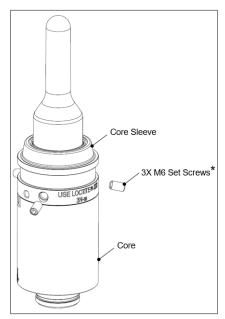

Apply HGT-80 on all SHCS's that are used to mount Slides to Connecting Bars.

19.12 TORQUE SPECIFICATION FOR EOAT ASSY. TO ROBOT

Apply HGT-80 on all SHCS's that are used to mount EOAT Assembly to Robot Carriage.

19.13 TORQUE SPECIFICATION FOR NEXPET CORE SLEEVE SET SCREWS

Figure 10 – Torque Specification for NexPET Core Sleeve Set Screws

^{*}Apply LOCTITE® 222 or equivalent to the set screws and tighten them to 3N-m [2.2 lb-ft] – refer to NexPET mold manual for detailed installation instructions.

CLASS A NOTES:

All Class A connections shall use Torque Record Report

CLASS A TORQUERECORD REPORT
Lookup torque values must be predefined prior to assembly
Operator to record name for each torqued connection point
Inspector to record name for each verification point
This report is a CTQ supplier deliverable
This report will be available for post build reference
Refer to SWI-2551
