

Machine Upgrades

Control Solutions for GE Machines

As current technology evolves, older components are at risk of becoming obsolete. Critical control components on G-Line and other GE Fanuc-based machines are in limited supply, and certain components may be unavailable shortly. GE Fanuc Series 90-30 controller components have been made obsolete by the OEM and as such are no longer available. Husky has made efforts to be able to provide critical components for a period of time and minimize any immediate impact to our customers. Despite these efforts, supply is limited, and certain components will no longer be available.

Machine Upgrade No. OM-005

Category

- Performance & Productivity Improvements
- Reduced Energy
- Improved Maintainability
- **Obsolescence Management**

Upgrade Benefits

Husky is constantly developing solutions to evolve with changing technology and to help you more effectively manage your investment in your equipment. Please speak with your Husky Business Advisor to learn more about our selection of Encore™ programs that help ensure long term platform support and sustainability. Together, we can work proactively to find the best solutions to meet your needs and minimize the risks of machine component obsolescence.

Installation Instructions

Lead time varies depending on product – please refer to your quotation for details. To request more information about ordering Upgrades and Encore™ products, please contact your local Husky Business Advisor for a comprehensive quotation.

IMPORANTANT UPDATE: GE Axis Positioning Modules (HPN 729685) are no longer available for sale. Please contact your CSM Business Advisor or Regional Service Advisor for Control Upgrade Options.

Product Line Affected

- All G-Line Machines
