## Maintaining Current IPC Backups

**Having most up to date software backup can help avoiding extended machine downtime in the event of software corruption or IPC failure. It could also streamline the ordering of an Upgrade.**

Contact Husky for enquiry:

Europe & Africa: [afmaemea@husky.ca](mailto:afmaemea@husky.ca)

Machine Upgrade No. **IM-002**

### Upgrade Benefits

A backup is a copy of the computer software taken and stored elsewhere so that it may be used to restore the original in the event of a data loss.

Having a current copy of the machine IPC software helps get your Husky machine back up and running much faster.

Our recommended best practice is to create a new backup at least every six months or after any significant process / tuning changes on the machine.

### Installation Instructions

Please contact your Husky Regional Service Manager if you need assistance in creating machine backups.

Husky will also store backups that are sent to Husky.

Please feel free to contact us at the email addresses below for detailed information.

### Product Line Affected

- All Polaris Controlled Machines
